

## **“A Light In The Darkness”**

**By Andrew Sullivan**

**11/29/2016**

F            C    G            C  
They say life is crazy, but you already know  
F                    C            G    C  
That these days aren't like the warmer days of old  
F                    C    G            C  
You can't count on your neighbors, You can't count on time  
F            C            G            C (repeat pattern in second verse)  
You can't even count on living through your prime

**F            C            G            C**  
**I don't need power, I don't need wealth, I don't need fame**  
**F            C            G            C**  
**I wanna be loved but I also need to give love just the same**  
**F            C            E            Am**  
**In the end I know the most important thing to me**  
**F            C**  
**Is to be a light in the darkness**  
**G            Am**  
**A light in the darkness**  
**F            G    C**  
**A light in the dark-ness**

I never thought I'd get to sing my songs  
Every day to folks like you for my job  
It's truly an honor but don't be misled  
It's a struggle to keep this from going to my head, remind me

Bb            F            C    G  
What good is a man without a reason  
Bb            F            C    G  
For everything worthwhile in life that he's done?  
Bb            F            C    G  
I don't wanna take all of the gifts I've received  
F            G  
And use them only for me
