

## When She Walks

Written by Andrew Sullivan in 2013

### Capo 2

Em            D            C            B  
When she walks, there's a halo around her hips  
Em            D    C            B  
When she walks, her rhythm's hard to resist  
Em                            D  
And she's so in tune with the typical guy  
          C                            D  
She makes em stand around and wonder why  
                  C                            D                    C    B *(pattern continues all verses)*  
they've got everything they've ever wanted in life but her

when she walks, it's a mystery in this town  
when she walks, all the fellas start coming round  
and she's so much stronger than girls her age  
she lives her whole life like she's on a stage  
and there ain't a soul around who can say what's going on but her

C                            D  
How many people have to live and die  
                  Em                            D  
before she meets someone who stays by her side  
C                            D  
and how many times will she turn and run  
                  C                            D  
when the love she's in starts getting fun  
                  C                            D  
when the love she's in starts getting fun  
                  C                            D  
when the love she's in starts getting fun  
          Em                    D                    C            B  
then she walks..

          Em    D    C            B  
when she walks, it's a half-hearted IOU  
          Em    D    C            B                    Em  
when she walks, it's always out on you...when she walks
